#### DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

Further scope of applicability of the present invention will become apparent from the detailed description given hereinafter. However, it should be understood that the detailed description and specific examples, while indicating preferred embodiments of the invention, are given by way of illustration only, since various changes and modifications within the spirit and scope of the invention will become apparent to those skilled in the art from this detailed description.--

On page 4, please amend the paragraph beginning on line 5, as follows:

--For intuitive understanding of the invention, a simple case is taken into consideration, involving only one target,  $m_1$ , and four stations  $s_1, s_2, s_3, s_4$ , as shown in Figure 1. Now assume that the measurements  $d_{12}, d_{34}, d_{13}, d_{24}$ , are performed, where  $d_{ij}$  means the total distance  $s_i - m_1 - s_j$ . It will be appreciated that  $d_{12} + d_{34} = d_{13} + d_{24}$  must be the case since both expressions mean the total distance from the target to the four stations.--

On page 8, after the last line, please insert the following paragraph:

--The invention being thus described, it will be apparent that the same may be varied in many ways. Such variations are not to be regarded as a departure from the spirit and scope of the invention, and all such modifications as would be recognized by one skilled in the art are intended to be included within the scope of the following claims.--
